The K-Line Ag TrackAttack™ efficiently levels paddocks in just one pass. This reliable machine is perfect for tackling wheel tracks, ruts, and uneven terrain, making it an essential tool for tramline farming.

Tramline farming separates crop zones and traffic lanes to reduce soil compaction and improve profitability, yield, grain quality, and sustainability. The TrackAttack™ loosens soil with front-row discs and follows with a crumbler roller, leaving a flat, even, and weed-free surface for easier equipment movement.

By reducing soil compaction and promoting healthy root growth, the TrackAttack™ enhances water infiltration and soil health. Its versatility allows it to handle various soil types, making it a key tool for improving crop yields and farm productivity.

### Features

- Discs cut through the ground, loosening and moving the soil onto the tram-line
- Crumbler roller follows behind breaking down the soil and cloddy dirt
- Leaves the tram-line with a flat and even weed free surface

### Benefits

- Leaves a level wheel track
- Improves profitability and sustainability
- Two row system ideal for working in residue with minimal bunching

## TRACKATTACK® SPECIFICATIONS

CODE	DESCRIPTION	WHEEL TRACK CENTRES	WORKED WIDTH PER TRACK (APPROX.)
2840D	4m (13') TrackAttack™	2m-4m	1.1m – 1.6m
284WD	4m (13') TrackAttack™	3m-4m	1.6m – 2.1m
